

1

A diagram consisting of three labeled points and three intersecting curves. Point 1 is at the top center, point 2 is to its right and lower, and point 3 is to the left of point 2. Three curves are shown: one passing through point 1, one passing through point 2, and one passing through point 3. The curves intersect in a complex, non-linear fashion, with the curve through point 1 crossing the curve through point 2, and the curve through point 2 crossing the curve through point 3. The curves are thick and black, and the points are solid black circles.
